REGISTE

FORM A2.
BRITISH RAINFALL.
24 JUN 1910

Kept at Ambergate Reservoir
in the County of Derbyshire
by The Resident Engineer

RAIN GAUGE
Pattern Negretti & Zambra
Diameter of top 5 in.
Height of top above Ground — ft. 10 in.
" " " Sea Level 650 ft.
Time of Observation 10 a.m.
Nearest Railway Station
Name Ambergate
Distance ½ mile Direction South

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

3 JAN 1911

Kept at Ashbourne. Water Works

in the County of Derby. 4

by James W Twigg

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 582 ft.

Time of Observation 9 oclock

Nearest Railway Station
Name Ashbourne
Distance 1 Direction N W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
2 JAN 1911

Kept at Calcliff : Bakewell

in the County of Derby 6

by Thomas Fenton.

RAIN GAUGE
Pattern
Diameter of top 12 in.
Height of top above Ground 2 ft. in.
" " " Sea Level 411 ft.

Time of Observation 9 AM

Nearest Railway Station
Name Bakewell
Distance ¾ mile Direction ENE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

12 JAN 1911

Kept at Highfield Belper

in the County of Derby 6

by Lt Col M Hunter AMICE.

RAIN GAUGE
Pattern old
Diameter of top 8 in.
Height of top above Ground ft. 8 in.
" " " Sea Level 310·48 ft.

Time of Observation 9 AM

Nearest Railway Station
Name Belper
Distance ⅓ mile Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

12 JAN 1911

Kept at Burbage Edge

in the County of Derby. 6

by The Urban District Council of Buxton

RAIN GAUGE
Pattern
Diameter of top 8" in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 1400 ft.

Time of Observation 9 a.m

Nearest Railway Station
Name Buxton
Distance ~~[illegible]~~ Direction E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM A. BRITISH RAINFALL.

25 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Buxton Devonshire Hospital

in the County of Derbyshire 6

by F. J. Kieldsen Esq

RAIN GAUGE
Pattern
Diameter of top in.
Height of top above Ground ft. in.
" " " Sea Level ft.

Time of Observation

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

So

REGISTER OF RAINFALL IN 1910.

FORM A2. BRITISH RAINFALL.

12 JAN 1911

Kept at Portobello Bar

in the County of Derby. 6

by The Urban District Council of Buxton

RAIN GAUGE
Pattern
Diameter of top 8" in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 1600 ft.

Time of Observation 9 am

Nearest Railway Station
Name Buxton.
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2. BRITISH RAINFALL.

31 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Chellaston

in the County of Derbyshire 5

by H. Chambers Esq

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 170 ft.

Time of Observation

Nearest Railway Station Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL. 10 JAN 1911

Kept at Cross Hill, Codnor,

in the County of Derby.

by A. D. Pine

Rain Gauge
Pattern Met. Office
Diameter of top 5" in.
Height of top above Ground 1 ft. - in.
" " " Sea Level 371·8 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Cross Hill & Codnor M.R.
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

24 JUN 1910

Kept at Darley Hall

in the County of Derby

by Alfred Clay

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 400 ft.

Time of Observation 9 a m.

Nearest Railway Station
Name Darley Dale
Distance 1/2 mile Direction S W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

by The Trustees

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 8 in.
" " " Sea Level 361 ft.

Time of Observation 10 a. m

Nearest Railway Station
Name Darley Dale
Distance 300 yds Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

11 JAN 1911

Kept at WHITWORTH INSTITUTE, DARLEY DALE.

in the County of Derby 6

by The Trustees of Whitworth Institute

RAIN GAUGE
Pattern ordinary
Diameter of top 5 in.
Height of top above Ground 1 ft. 8 in.
„ „ „ Sea Level 361 ft.

Time of Observation 10 a.m.

Nearest Railway Station
Name Darley Dale
Distance 1/4 ml Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909.

FORM A2. BRITISH RAINFALL.

5 JAN 1910

Kept at The Derby Arboretum,

in the County of Derby.

by John Ward Mr Inst. C.E. Borough Surveyor

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 196 ft.

Time of Observation 8.45 am.

Nearest Railway Station
Name Derby, M.R.
Distance ½ mile Direction NE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL. 6 AUG 1910

Kept at 42 Duffield Rd

in the County of Derby

by Walter G Copestake (Dr)

Rain Gauge: Pattern Copper Top. Tin bottom
Diameter of top 5 in.
Height of top above Ground 8 ft. 0 in.
" " " Sea Level 184 ft.

Time of Observation 9. a m

Nearest Railway Station: Name Gt Northern Ry
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
31 JAN 1911

390

Kept at Derby Wild Street

in the County of Derbyshire 6

by Messrs J. Davis & Son

RAIN GAUGE
Pattern
Diameter of top in.
Height of top above Ground ft. in.
" " " Sea Level ft.

Time of Observation

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

31 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Duffield Castle Hill House

in the County of Derbyshire 6

by Messrs J. Davis & Son

Rain Gauge: Pattern ………
Diameter of top ……… in.
Height of top above Ground ……… ft. ……… in.
" " " Sea Level ……… ft.

Time of Observation ………

Nearest Railway Station: Name ………
Distance ……… Direction ………

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGIS[illegible] IN 1909

FORM A2. BRITISH RAINFALL.

10 JAN 1910

Kept at Bretton

in the County of Derby

by Miss Moorhouse for Rev. F. L. Shaw

RAIN GAUGE
Pattern Ordinary
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 1200 ft.

Time of Observation 9-0 am

Nearest Railway Station
Name Grindleford
Distance 4 mile Direction E.N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

RAIN GAUGE
Pattern Negretti & Zambra
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 945 ft.

Time of Observation 9. a. m

Nearest Railway Station
Name Grindleford
Distance 4 m. Direction N. E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL 3 JAN 1911

Kept at Kirk Langley

in the County of Derby 6

by W. Goodall Copestake J.P.

Rain Gauge: Pattern
Diameter of top 8 in.
Height of top above Ground ft. 15 in.
" " " Sea Level 345·5 ft.

Time of Observation 9. A.M.

Nearest Railway Station: Name Mickleover
Distance 2¾ Direction S

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.
-6 JAN 1911

REGISTER OF RAINFALL IN 1910.

Kept at Littleover Old Hall

in the County of Derby 5

by L. McInnes

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 2 ft. 6 in.
" " " Sea Level 346 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Derby
Distance 2¼ miles Direction E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

4 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at "Rockside," Matlock

in the County of Derby.

by John D. Evans. Town Hall.
for the Matlock Urban District Council.

RAIN GAUGE
Pattern Snowdon.
Diameter of top five in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 637 ft.

Time of Observation 9 a.m. daily.

Nearest Railway Station
Name Matlock
Distance 3/4 mile Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
3 JAN 1911

Kept at *The Gables. Matlock*

in the County of *Derby*

by *Wm. Robert Wildgoose*

RAIN GAUGE:
Pattern
Diameter of top *five* in.
Height of top above Ground *one* ft. — in.
" " " Sea Level *450* ft.

Time of Observation *9. a. m.*

Nearest Railway Station: Name *Matlock*
Distance *⅓ mile* Direction *W*

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

MELBOURNE VICARAGE,
DERBY.

29 APR 1907

April 28th 1907

Dear Sir

The rain fall on Oct 26th last was a great puzzle to me. I examined the rain guage just before dark on October 26 & there was nothing in it. The next morning the garden showed signs of heavy rain, so much so, that I was not surprised to find the ~~g~~ bottle heavy, nor when I measured 1·35

It was not until the next day that I found that at the Hollow there had been comparatively a small rain fall

I then instituted inquiries, and I satisfied myself that no one had been in the garden between my going to it 5 pm & visiting it next morning at 9. am & that no trick had been played upon me.

This is the only explanation I can give.

At 9. am I measured 1.38 while the night before there was none at all.

At the same my garden & water-tubs showed signs of heavy rain, and I have no reason for doubting that there was an exceptionally heavy fall on my garden.

I am faithfully yours
John J Singleton.

S.a.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.
